## UHAP-2 (Underrun Hollow Aluminium Profile - Generation 2)

Underrun protection	Weight	Itemnr.
undrilled	65,0kg	14 996 500
MAN	65,0kg	14 996 600
Mercedes	65,0kg	14 996 700

The practical and light protective profile made of steel is suitable for plant vehicles. The design of the protective profile prevents bulk material from collecting on top of the protective profile when it is tilted.

The steel trusses are supplied as standard with a zinc-manganese-phosphate primer and a top coat with a high-quality finish and good corrosion resistance.

## EUFA (Endplate Underrun Protection Foldable and Adjustable)

Underrun protection	Weight	Itemnr.
Iveco	74,9kg	21-590278
Volvo/RVI	76,9kg	21-590378
Scania/Mercedes	75,8kg	21-590478
undrilled	77,4kg	21-590578
Accessories		Itemnr.
Spring kit		21-587578
Mounting tool kit		39-035100

The underrun protection can be integrated into a flexible system for driving with large-volume rigid drawbar trailers. Thanks to the adjustable arm, the height and length of the protective profile can be changed. It makes it easier to fold the underrun protection profiles up and down, for example to reach a coupling that is mounted deep and far to the rear.
